

## Oil Drilling

V-Flo introduces advanced digital machine center and large quantities of processing equipments and experimenting and testing facilities. We own winch, derrick, pumping unit, production line of high pressure hoses, drilling equipment, general production line of well cementation equipments and fracturing equipments, 2 testing grounds for large scale drilling machine, 1 online testing ground and high pressure lab for pressing fixing equipment. Our factories also covers business of forging, casting, plug weld, machining, digital machining center, gears, heat treatment, assembling where we have key equipments more than 100 units and common equipments more than 1000 units.

V-Flo is capable of delivering truck-mounted drilling machine which can drill from 1000 meter to 4000 meter, skid-mounted drilling machine which can drill from 1000 meter to 7000 meter, pull-type drill machine which can drill from 1000 meter to 4000 meter, well serving machine which is capable of handling from 25 ton to 225 ton, ocean drilling machine which can handle from 60 ton to 225 ton, oil well testing equipment which can handle from 4000 meter to 7500 meter, heavy load truck from 50 ton to 70 ton, top driven drilling equipment, slurry pumps, well mouth toolings, truck-mounted drilling and fixing equipment, 30 units of large scale drilling repairing machine, 150 units of well cementation and cracking equipments.
